## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-6 are allowed. The following is an examiner's statement of reasons for allowance: The claims are allowable over the prior art of record because the teachings of the references taken as a whole do not teach or render obvious the combination set forth, including that of a transmission apparatus to hold a lock core having an inner housing with an inner shoulder, an inner disk abutting the inner shoulder, a lock coupler, a latch bolt coupler, a restitution element mounted around a latch coupling arm of the latch bolt coupler to provide a restitution force to hold the latch bolt coupler in place (claim 1, lines 16-17), and a cover attached to the rear of the inner housing, compressing the restitution element.

The closest prior art, U.S. Patent Number 3,404,549 to Best, discloses a lock core housing with an inner disk, a lock coupler, and a latch bolt coupler. However, Best does not disclose a restitution element that is mounted around the latch bolt coupler and provides a restitution force to hold the latch bolt coupler in place.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
